Discover the new
wall hung solution
INGENIO

Sanitary expertise
& water friendly

SIAMP your partner

Expertise in aesthetic, hygienic, quiet and sustainable toilet solutions.

Sanitary specialist and leader in technical equipment for cisterns, SIAMP has over 70 years' experience in providing flushing solutions.

Expertise in toilet technology that offers reliable, water efficient and sustainable solutions, patented and certified worldwide.

Our new generation wall frame solution **INGENIO** makes for simple installation, with minimal effort.

Reassurance of a 10 year guarantee.

INGENIO built-in technology: the solution for an attractive toilet area

Why choose a wall hung solution?

In just a few decades the toilet area has become the focus of our attention, no longer the functional space it once was. In this time bathrooms and washrooms have become a key design element in the architecture of every building.

- Create a **luxurious** look, with a suspended toilet, cistern concealed within the wall and designer flush plate. The toilet becomes a focal point.
- **Hygienic**, with the toilet suspended, the floor is clear from obstacles to make cleaning easier. Concealed pipework means there are less traps for dirt to gather.
- **Accessible**, the height of the bowl can be raised for comfort or to aid the less-abled.

SIAMP

& water friendly

Why choose INGENIO ?

70 years

For over 70 years, **SIAMP** has been innovating the sanitary industry with commitment to research and development

10 years

Guarantee

Fast setting, specify and install with confidence

Ultra quiet, and water saving. QUIETO delayed action inlet valve with acoustic levels of only 9dB

Compliant with EN14055 Type 2

INGENIO load bearing to 400kg

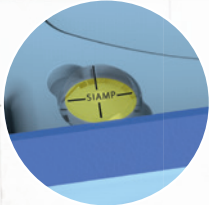

Large choice of elegant and stylish flush plates

INGENIO, complete innovation

STRUCTURE

- Anti-corrosion treated
- Bearing a 400 kg load
- Level : built-in bull's eye spirit level

MAINTENANCE

- Supplied with 1 additional outlet valve seal and diaphragm

CISTERN

- Leak-proof cistern
- Ultra quiet, water saving delayed action inlet valve
- Insulated, 6/4L preset
- Easy maintenance: direct access through the flush plate window
- Possible dry riser with the rear cover

WATER CONNECTION

- Left or right water connection
- Water connection is made inside the cistern

STOPCOCK

- Accessible from the outside of the cistern
- Ultra quiet : built-in hose

INNOSIAMP

PROTECTIVE SHROUD

- Suitable for deep partitions
- Protection of the connections during the construction phase (bowl and flush plate zones)

INNOSIAMP

OUTLET PIPE

- Outlet pipe secured by simple clamp

PROTECTIVE SHROUD

- Suitable for deep partitions
- Protection of the connections during the construction phase (bowl and flush plate zones)

INNOSIAMP

FEET

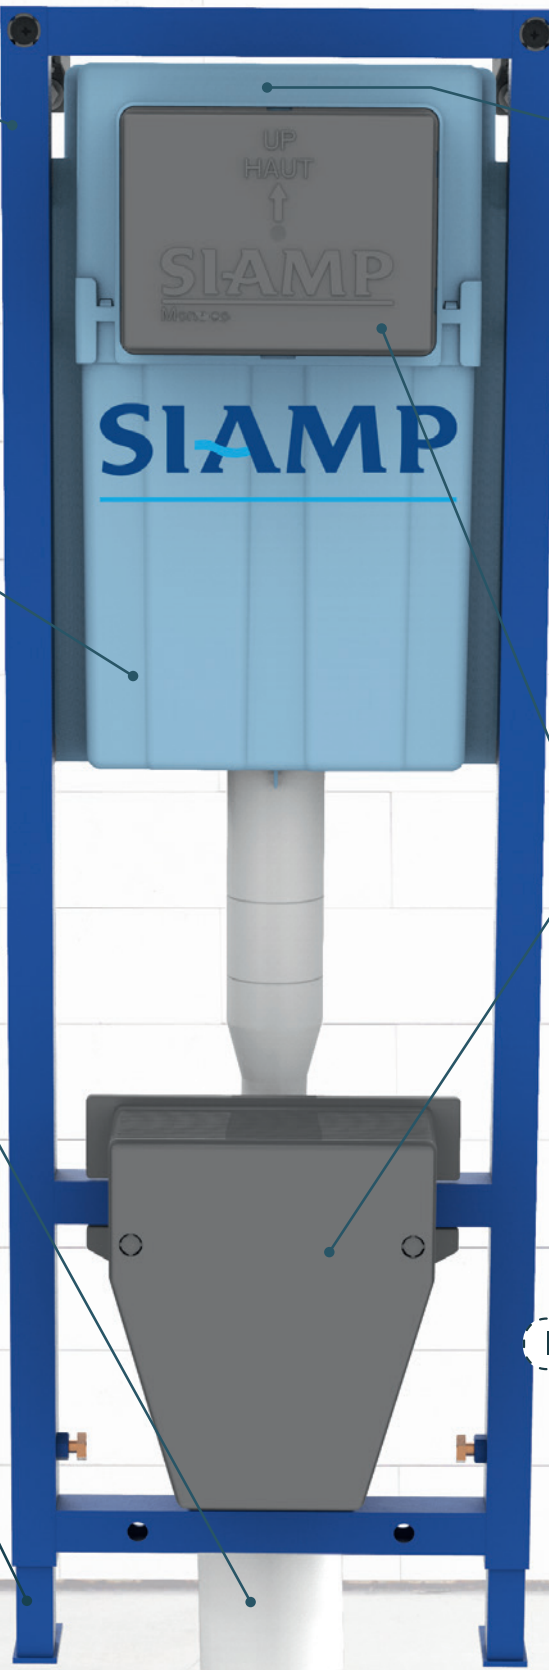

- Delivered in the installation position
- Self-braking : easy height adjustment by a single person

INNOSIAMP

INNOSIAMP

BOWL FIXING

- Quick fixing
- One unique single piece
- Reinforced with a fibreglass structure
- No cutting
- Adjustable depth

Narrow: 35 cm overall

INGENIO, water saving combined with ultra quietness

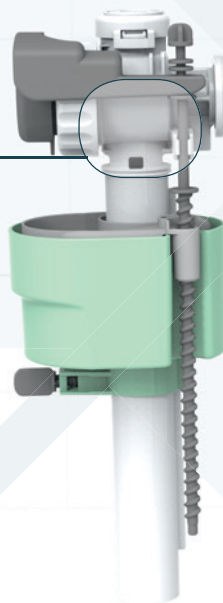

QUIETO, the solution for the quietest filling on the market,
acoustic level of only 9 dB

INNOSIAMP

A unique combination that allows the flow of water whilst gradually reducing the pressure.

TINY MARBLES

A case full of tiny marbles reduces the water flow pressure entering in the inlet valve.

CURVED

Accompanies the water flow.

STRAIGHT STOPCOCK

- Allows a continuous water flow unlike an angled stopcock.
- Integrated flexible tube.

DELAYED ACTION OPENING INLET VALVE

- Water saving.

[VIDEO OF THE QUIETO OD INLET VALVE IN OPERATION](#)

> Save in quietness

Thanks to the extensive research on its internal hydraulic system, the QUIETO inlet valve offers an exceptionally quiet operation. The progressive loss of pressure in the inlet valve allows a filling acoustic level among the quietest on the market with an acoustic level of only 9dB.

In addition, the delayed opening of the QUIETO delays the filling of the cistern while the flush valve is opened. This exclusive system saves 3 litres of water per day (calculation based a dwelling with 1 bar pressure and 4 occupants).

> Easy care and maintenance

The QUIETO inlet valve is easy to remove from the cistern.

If maintenance is required, simply extract the inlet valve from the **INGENIO** cistern through the flush plate window. No tools are needed : the removable cover on the rear of the cistern allows a dry riser's maintenance.

All spare parts are readily available.

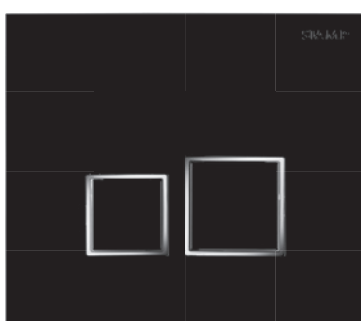

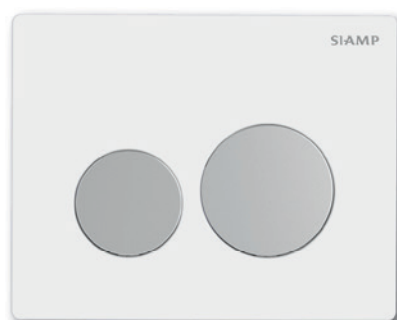

How to choose your flush plate?

Combine your wall frame with an inspirational flush plate.

This is the main element of your WC, it will be in harmony with your style and the decoration of your room.

Made from ABS, metal, glass or wood panel, classic or modern, the **SIAMP** flush plates offer a wide variety of design, materials and colours, exceeding all expectations.

DESIGN - MATERIAL - CREATIVITY

DRIVEN BY DESIGN

Available in different models and various decorative versions, light and robust, a wide choice of flush plates made from ABS, find the one to match your style.
